COMPANY PROFILE

DDI International, Inc. is incorporated in the State of Texas and is fully insured for onshore and offshore services. Our goal is to handle all of your inspection needs and provide inspectors that are highly qualified, courteous and friendly and who will work with you to achieve satisfactory results for all of your projects.

As DDI strives to become the leading international provider of Inspection services, we will continually upgrade our inspection protocol and abilities by embracing new technology as it becomes available, and will always welcome input and critique from our clients to ensure that our clients receive the highest quality of reporting and inspection services possible with available technology.

DDI has developed through extensive research, the **IDPS** inspection software system. The **IDPS** reporting system and our web based **IDPS Global Logistics Management** software were designed as inspection programs capable of providing **speed** and **accuracy** in inspection data reporting and report delivery.

Our main objective was to develop a state of the art program that would help provide **solutions** and **cost savings** for our client's bottom line cost in their day-to-day operations.

The **IDPS Global Logistics Management** software gives DDI International, Inc. the ability to **custom design** particular inspection projects that fit the needs of our clients. Custom templates are generated for any type of inspection protocol and delivered with the same speed and accuracy integrated into the **IDPS** reporting system. The **IDPS Global Logistics Management** software is a secure web based program designed for viewing, data management with query

and updating features interactive with client access and management that is maintained long term by DDI International, Inc.

DDI inspection services are offered and provided in accordance with and in observance of the laws, rules, regulations and recommended procedures as established by the **ABS** (American Bureau of Shipping), **ASNT** (American Society for Non-Destructive Testing), **ASME** (American Society of Mechanical Engineers), **MMS** (Mineral Management Services), **NACE** (National Association of Corrosion Engineers), **OPS** (Office of Pipeline Safety), **API** (American Petroleum Institute) and Military Specifications.

- ISNETWORLD
- PEC Premier
- VERAFORCE
- CCR

QUALITY

DDI can provide reports that are simple carbon copies to elaborate hardbound presentations. Our reports are presented with photos and any documentation necessary required by you and your client. We understand that the more information presented the easier it is to make a determination.

All of DDI's equipment is up to today's standards and calibrated annually according to manufacturers recommendations ASME section 5/SNT-TC-1A.

All personnel certifications are kept current with industry standards.

SAFETY

Safety should never be sacrificed for production. It is an integral part of quality control, cost reduction and job efficiency. DDI International, Inc. has a written safety program and requires our inspectors to have read and enforce all safety procedures developed by the company. Regular safety site visits and training by the safety personnel are required.

INSPECTOR QUALIFICATION

All of DDI's inspectors who arrive at the workplace are certified to SNT-TC-1A and a copy of their certifications can be e-mailed or faxed to you prior to their arrival. Along with being certified, they will be familiar with the work scope and all codes and standards that apply.

SERVICES and INSPECTIONS UTILIZING IDPS

NDT RESOURCES

DDI has contracted Paul T. Marks, NDT Training and Testing Center to handle our Level III needs; i.e., write procedures according to SNTC-1A and also test and certify all of our Level II inspectors.

DATA RECORDING SERVICES

DDI International, Inc. offers data recording services as an important component of our Inspection protocol. We provide qualified inspectors to accurately and expediently collect critical data for all levels of inspection, whether underwater or above water, in the offshore or onshore environments.

DDI data recording services cover a broad spectrum of inspection disciplines throughout a variety of industries. These include but are not limited to NDT, Level II, III, and IV Underwater Inspections that utilize either divers, or ROV's, or a combination of both methods, Pipeline, Refinery, Rope Access visual inspections, Water treatment and processing plants, Bridges, Vessel Hull inspections, Storage vessels, and Topside Level I inspections.

CONSULTING AND TRAINING
